President's Report

MLMIC continued to strengthen financially throughout 2011, a year that brought many positive changes to the Company. During the year, the focus remained on reducing risk for the Company, while trying to find ways to generate sufficient growth in our core market. Our Princeton subsidiary was sold, surplus continued to grow, we started a dialog with a new State regulatory department, and we continued to benefit from close working relationships with a variety of coalition partners who are addressing the changing healthcare environment both locally and nationally.

Last year, your Board approved the sale of our Princeton subsidiary to Medical Protective Corporation, a Berkshire Hathaway Company. That sale became final in December through the combined efforts of all parties. When the interstate practice of medicine did not develop between New York and New Jersey over the past ten years, MLMIC sold Princeton to enable both companies to concentrate on their respective core markets. I feel that both companies benefited from the long relationship and emerged stronger than when they started.

Surplus growth has continued for all of 2011 to over one billion dollars, approaching the level of ten years ago. A company the size of MLMIC requires even higher surplus to stay healthy in the event of a downturn. One of the yard sticks of that health is the Risk Based Capital score that is used in all of the other states except for New York, which at the present time, provides an exemption for its admitted medical liability carriers. The Company requires more surplus to pass that metric due to the size of our potential liabilities. The surplus we now have brings us to the minimum score that is maintained at three to four times higher by similar companies outside of New York. I feel that maintaining adequate surplus is essential for our policyholders who depend upon the Company to be there to protect them well into the future.

Governor Cuomo announced the formation of the Department of Financial Services. which was launched on October 1st. Ben Lawsky is the new Superintendent who will oversee the Insurance Division headed by Rob Easton. MLMIC representatives met with both individuals in December to acquaint them with our mission and our willingness to work with them to the benefit of our policyholders. There are many legacy issues from the old department that continue to demand cooperation between both parties if there is to be any resolution. Issues concerning rate adequacy and financial responsibility for the liabilities of the Medical Malpractice Insurance Pool of New York were some of the topics that were covered.

The changing healthcare environment in 2011 brought the Company closer to a variety of coalition partners who are identifying risks and recommending solutions for our policyholders. We worked closely with the Medical Society of the State of New York and the New York State Dental Association, along with various hospital groups, to identify and address solutions to many situations that go along with the changes to healthcare delivery that are on the horizon. Individual practitioners and groups are aligning themselves with large hospitals, creating unique risks and situations that require different insurance products for both parties. The Company also had a representative on Governor Cuomo's Medicaid Redesign Team, and it has worked with hospital groups to analyze the effect of the Medical Indemnity Fund that was created during the last State budget cycle.

A component of the changing malpractice environment includes the claims free discount that was announced last year and implemented for the July 1st renewal cycle. Because there is a growing trend to involve multiple policyholders in a single claim, the Company is aware of the fairness issue that goes along with such a wide net. We are currently examining the definition of what constitutes the claims free discount.

The year 2011 was favorable with the caution that no insurance cycle lasts forever. Your Company remains dedicated to provide our policyholders with the best possible insurance at the lowest cost consistent with solvency.

Robert A. Menotti, M.D. President of MLMIC March 28, 2012

Our Princeton subsidiary was sold, surplus continued to grow, we started a dialog with a new State regulatory department, and we continued to benefit from close working relationships with a variety of coalition partners who are addressing the changing healthcare environment both locally and nationally.

Business & Operations

Overview

Medical Liability Mutual Insurance Company (MLMIC) is a mutual insurance company, owned and directed by the healthcare professionals it insures. With assistance provided by the Medical Society of the State of New York (MSSNY), MLMIC was originally organized in 1975 in response to a crisis of availability of medical professional liability insurance.

The integrity, vision, and consistently high standards set by MLMIC's Board of Directors endure and explain why MLMIC is the only professional liability insurance company endorsed by MSSNY, numerous county and specialty medical societies, the Iroquois Hospital Association, the New York State Dental Association (NYSDA), and many of its component dental societies.

In New York, MLMIC insures 47 hospitals, about 17,000 physicians and surgeons, and approximately 4,000 dentists and oral surgeons, as well as numerous other healthcare providers and facilities. From this substantial insured population, MLMIC has developed a current and comprehensive statistical database on medical and dental professional liability claims to evaluate causes of loss, claim trends, and specialty and territory risk relativities. MLMIC is the entity resulting from its merger in 2001 with the Healthcare Underwriters Mutual Insurance Company (HUM).

Management and direction of MLMIC is accomplished through its Board of Directors, which is primarily comprised of physicians, dentists, and hospital executives. As an active participant in the national organization, Physician Insurers Association of America, as well as with national medical and surgical specialty societies, MLMIC has been a leading force in the development of risk management programs and systems, cause of loss identification, and patient safety education both in New York and nationally. MLMIC officials have frequently represented the interests of the healthcare professions on issues relating to tort reform at the national and state level.

In New York, MLMIC insures 47 hospitals, about 17,000 physicians, and approximately 4,000 dentists.

Underwriting and Policyholder Services

Policyholders – MLMIC underwrites professional liability insurance in New York for physicians and surgeons, their employees, hospitals, other healthcare facilities, and dentists, as well as professional liability, general liability, and directors' and officers' liability insurance for certain other groups and entities.

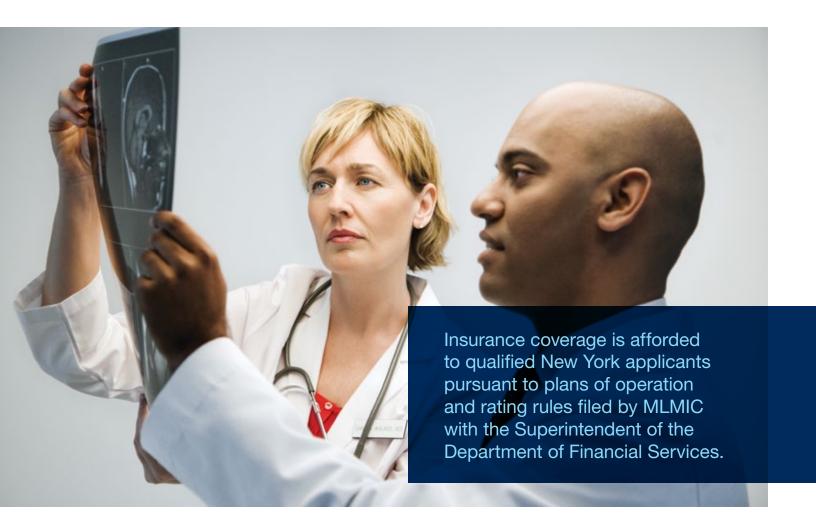

The primary purpose of underwriting is to evaluate the type of exposures each risk poses and establish premiums for those risks and exposures. In the evaluation, classification, rating, and selection of risks, MLMIC's emphasis has always been on equity, quality, and reasonableness of cost. Policyholder service representatives are available to answer questions, provide claim histories and certificates of insurance upon request, address billing issues, and provide support to insureds.

For physicians, MLMIC's underwriters also assist the Physician Underwriting Committee in its deliberations on various classification and coverage issues. They also work with the Physician Underwriting Committee and its Peer Review Committee to monitor the claims experience of MLMIC insureds through peer review and to interview policyholders and applicants for coverage, when necessary. MLMIC's dentist policyholders have a similar review program administered by the NYSDA– MLMIC Underwriting/Claims Committee, which is composed of dentists appointed by NYSDA.

Policy Provisions – MLMIC issues nonassessable policies and offers both occurrence and claims made coverage to physicians, surgeons, dentists, hospitals, and other healthcare facilities. Primary policy limits of liability are available for physicians and surgeons in amounts up to \$1,300,000/ \$3,900,000 (each person/annual aggregate). Primary policy limits of liability are available for dentists in amounts up to \$2,000,000/ \$6,000,000. MLMIC's standard professional liability policies provide coverage up to the applicable limits of liability without a required deductible or co-insurance retention provision. MLMIC policies insuring physicians, surgeons, and dentists afford limited reimbursement for loss of income in the event an insured, at the request of MLMIC, appears in court during trial as a defendant for a covered claim.

MLMIC-insured physicians, surgeons, and dentists may be eligible for "defense only" coverage, with limits ranging from \$25,000 to \$100,000. This coverage provides for the costs of defending an administrative action brought against a policyholder, which arises out of allegations that could form the basis of a claim for legal liability under an insured's policy. Defense only coverage also includes legal costs for governmental proceedings alleging Medicare/Medicaid fraud and/or abuse. Depending on the class of business, this coverage is either included in the basic policy or is available by endorsement for an additional premium charge.

Separate limits of liability of up to \$1,000,000/ \$3,000,000 may be available for an additional premium charge to an eligible professional entity formed by physicians, surgeons, or dentists. MLMIC offers medical professional liability coverage for hospitals and other types of healthcare providers and facilities on occurrence and claims made policy forms with primary limits of liability of \$1,000,000 each person and \$3,000,000 total liability (i.e. annual aggregate). Higher primary limits, excess coverage layers, and umbrella coverage may also be available to certain facility policyholders.

Eligibility for Insurance – Insurance coverage is afforded to qualified New York applicants pursuant to plans of operation and rating rules filed by MLMIC with the Superintendent of the Department of Financial Services (the Superintendent), formerly the NYS Insurance Department. In order for dentist applicants to qualify for insurance, they must also be members in good standing with NYSDA.

An applicant who has prior adverse loss experience or displayed improper conduct or methods of practice may not be eligible for insurance with MLMIC. Applicants for insurance must file an application with MLMIC, detailing the history of their prior claims and professional activities, which will be used as the basis for determining risk acceptability and the premium amount to be charged. Premium Rate Structure – Pursuant to legislation, the Superintendent has been establishing premium rates for physician and surgeon policyholders for all New York State authorized insurers since 1985. MLMIC prepares an advisory rate filing to assist in rate determinations made by the Superintendent for each specialty class and territory.

For policy year 2011 (July 1, 2011 – June 30, 2012), the Superintendent accepted our recommendation that the base rate remain unchanged and authorized certain class and territory changes for physicians and surgeons. In April 2011, MLMIC was pleased to announce approval of its new *claims free discount* program for physicians and surgeons. The claims free discount is premised on past favorable loss experience being strongly indicative of what can be expected in the

BUSINESS & OPERATIONS (CONTINUED)

future. Therefore, a 7.5% discount is applied to a qualified policyholder's premium, if he/she: (1) has been in practice for a minimum of five years, and (2) has no open claims (or suits) and no closed claims (or suits) with indemnity or expense within the past 5 years (regardless of the accident date or report date).

MLMIC's premium rates for dental professional liability coverage are subject to prior approval by the Department of Financial Services. The Department approved a 10% rate increase effective June 1, 2011 for all dentists and oral surgeons.

Insured physicians, surgeons, and dentists, who have just completed training and are beginning their first year of private practice, receive a premium rate reduction of 50% of the standard applicable premium in their first year of private practice. Those insureds purchasing claims made coverage also receive a 25% reduction in their second and third years of private practice.

Physicians and surgeons who attend a basic risk management course and complete the related home study project will receive a 5% premium discount for two successive policy years. If they attend a follow-up course, as required, the 5% discount will be continued. Dentists who successfully complete NYSDA's risk management program receive a 10% discount for three successive policy years. The risk management programs are repeated for both physicians and dentists in subsequent years.

Insured physicians and surgeons principally affiliated with participating MLMIC-insured hospitals are entitled to a discount equal to 12% of the standard applicable premium, provided such insureds:

- (1) agree to complete a risk management and loss control program designated by MLMIC, and
- (2) agree to a joint defense of claims, when appropriate, consisting of a unified claims investigation and litigation defense by a single claims manager and attorney representing all such insureds in the program.

Physicians and surgeons benefiting from the previously described discounts provided to beginning practitioners and part-time practitioners are not eligible to receive this 12% discount simultaneously.

Periodic actuarial reviews of loss experience for professional liability insurance in New York indicate whether claims costs and expenses have been rising or falling from year to year and are the most important indicators of future rates. Were it not for MLMIC's low administrative expenses, which are less than those of many other similar type insurers, and its successful investment and claims management programs, the cost of professional liability insurance to MLMIC policyholders would be higher.

Distribution of Dividends – Physician and hospital policyholder dividends have not recently been declared. With regard to the NYSDA–MLMIC Program and MLMIC's commitment to share profits generated by the program with its dentist policyholders, New York dentist and oral surgeon policyholders have received about \$9 million in cash dividends throughout the history of the NYSDA–MLMIC Professional Liability Program.

Legal Services

Policyholders may access a variety of legal services provided by Fager & Amsler, L.L.P., counsel to MLMIC. The firm's experienced attorneys specialize in healthcare law, including professional liability issues, medical professional liability defense litigation, and regulatory compliance. Fager & Amsler attorneys are frequently called upon to render legal advisory opinions concerning medical and/or dental professional liability issues, liability litigation proceedings, regulatory compliance, and professional liability/misconduct hearings. They also conduct legal audits and assessments of areas of medical practice that require focused review and frequently serve as featured speakers at various medical and dental society member programs. The attorneys monitor current statutes, regulations, and case law, and keep insureds apprised when there is an impact on potential liability.

Claims

It is MLMIC's philosophy, as established by the Board of Directors, to settle meritorious claims as equitably and expeditiously as possible and to resist and aggressively defend cases without merit.

MLMIC maintains a professional claims staff whose experience is unequalled in the medical professional liability insurance industry. MLMIC's claims staff works with respected medical experts and the finest defense attorneys to provide policyholders with quality representation. Through the years, MLMIC has been the one company that has successfully defended more New York physicians than all other New York insurers combined – a fact held in high regard in the legal community.

Physicians and surgeons who attend a basic risk management course and complete the related home study project will receive a 5% premium discount for two successive policy years.

BUSINESS & OPERATIONS (CONTINUED)

MLMIC's claims teams are aware of the importance of conducting prompt evaluations and maintaining direct personal contact with policyholders. By conducting early and comprehensive analyses of claims and lawsuits, MLMIC seeks to control defense and settlement costs.

Every claim received against a physician, surgeon, or hospital is reviewed by physician members of MLMIC's Claims Review Committee. The reviewing physicians provide the claims staff and defense counsel with an evaluation of the claim's merit. When indicated, the Committee calls upon other recognized specialists to aid in the evaluation of claims. In most instances, MLMIC may not settle any claim or suit against an insured without his/her written consent. In the event an insured New York physician or hospital refuses to agree to the recommended settlement of a claim or suit, either the company or the insured may refer the matter for binding peer review. Physicians may choose to waive this consent for a premium discount of 5%.

Similarly, all claims against New York dentists are reviewed by the dentists who are members of NYSDA's Underwriting/Claims Committee. No claim against an insured dentist will be settled without the consent of a majority of the members of the District Claims Committee of the insured's component of NYSDA.

Management and direction of MLMIC is accomplished through its Board of Directors, which is primarily comprised of physicians, dentists, and hospital executives. MLMIC retains highly qualified attorneys to defend suits against its policyholders. The process of selecting attorneys includes personal interviews of applicants. As a result, more than one hundred firms have been approved to defend cases, based upon their competence and their commitment to resist groundless claims. Further, MLMIC has established certain minimum guidelines. These guidelines require each attorney to:

- provide individualized attention to the insured defendant and keep the insured apprised of the claim's progress;
- (2) meet as necessary with the insured after the basic investigation is received from MLMIC representatives;
- (3) explain the anticipated activities, expand on the investigation as necessary, and report to MLMIC representatives on the results of these procedures; and,
- (4) provide thorough preparation of the insured well in advance of the Examination Before Trial or any other court appearances that may be required.

MLMIC publishes these guidelines and distributes questionnaires to each defendant physician and dentist that evaluate the attorney's performance when a case is closed.

Risk Management & Continuing Medical Education

MLMIC provides its insureds with risk management programs to help improve patient care and, ultimately, reduce the frequency and severity of claims. Accredited by MSSNY to provide continuing medical education (CME) for physicians, MLMIC utilizes conventional formats and newer technologies, including an Internetbased format, to provide and deliver its CME programs. Satisfactory completion of these courses allows physicians to earn CME credits, the applicable premium credit, as well as qualify for participation in the excess medical malpractice insurance program.

Additionally, MLMIC is approved by NYSDA as a provider of dental education in New York. Dentists who complete these courses also qualify for participation in the excess medical malpractice insurance program.

MLMIC's Risk Management personnel also offer policyholders a number of additional services, including advisory opinions, a resource library, educational lectures and seminars, and consulting services, such as office practice surveys and quality assurance assessments.

Investment Policy

MLMIC has adopted a conservative policy for the investment of assets in order to preserve principal for future claim payments and to generate return on that principal with reasonable risk. The vast majority of all investments are in investment grade fixed maturity securities.

Membership & Management

Membership

As a mutual insurer, MLMIC's policyholders are the company's owners. MLMIC policyholders have input through the Board of Directors into vital areas of operation, such as rate-setting recommendations, claims management, underwriting and policy coverage provisions, merit rating, and risk management.

Each policyholder is a member, and only policyholders may be members. Each individual member has one vote at the annual policyholders' meeting, which is held on the first Wednesday after the first day of May in each year. Each hospital policyholder is entitled to ten votes at such meeting. HMO, PPO, and certain other healthcare facility members are entitled to either two or five votes, depending upon the organization's structure. Members may attend the annual meeting and any special meetings of members in person or by proxy.

At annual meetings, the members elect MLMIC directors and vote on any other business before the meeting.

The time and place of each annual meeting is established by the Board of Directors and is set forth in a notice with each policy issued by MLMIC. Membership in MLMIC is nonassessable, and no claim may be made by MLMIC against the assets of any member by virtue of membership other than the premium charge for that member's insurance policy.

Board of Directors

The management of MLMIC is the responsibility of a Board of Directors, which is comprised of up to 39 professionals. All but four directors must be members of MLMIC, and no more than half of the directors may be officers of MLMIC. An Executive Committee of the Board has been established to act in lieu of the full Board, to the extent permitted by law, when the full Board is not in session. The Board has established several committees, including a Finance Committee, an Underwriting Committee, a Claims Committee, and an Audit Committee to oversee those aspects of MLMIC's business. The Board of Directors, pursuant to the bylaws of MLMIC, is divided into three classes of 13 directors each*. One class of directors is elected each year to a three-year term.

*In addition, Mary Ann Bishara, M.D. and Irwin J. Cohen, M.D. serve as Directors Emeriti.

The present Board of Directors is composed of the following persons:

NAME	DIRECTOR SINCE ⁽¹⁾	SPECIALITY/AFFILIATION
John V. Capotorto, M.D.	2008	Endocrinology
William A. Dolan, M.D.	1996	Orthopaedic Surgery

Betsy Wright	2007	President and CEO, WCA Hospital

(1) Year started as a Director on either MLMIC's or HUM's predecessor Board

(2) Member of the Executive Committee

Officers

The officers of MLMIC are appointed by and serve at the sufferance of the Board of Directors. The officers presently serving are:

Robert A. Menotti, M.D., President

Richard M. Peer, M.D., Vice President and Secretary

James K. Reed, M.D., Vice President and Treasurer

Donald J. Fager, Vice President and Assistant Secretary Edward J. Amsler, Vice President and Assistant Treasurer

K. Wayne Kahle, Vice President and Comptroller

Daniel F. Canniff, Vice President

Servicing Contractor

Donald J. Fager & Associates, Inc. (Fager & Associates) is retained by MLMIC as servicing contractor to provide, under the supervision of the Committees of the Board and the officers of MLMIC, administrative functions on MLMIC's behalf. These services include underwriting activity, information services, marketing, actuarial support, and claims handling, including investigation of cases, monitoring of defense attorneys, and adjustment of claims with approval of MLMIC's Claims Committee. Currently, almost 13,000 open claims and lawsuits are being handled. In addition, risk management staff is provided to supervise extensive quality assurance programs for insured physicians and hospitals. At the present time, Fager & Associates employs a staff of about 410 people who render these services from offices in New York City, Syracuse, East Meadow, and Latham, New York. Fager & Associates provides policyholder services for all insureds.

Professional Services

MLMIC utilizes the services of professionals to handle specific tasks. INVESCO provides MLMIC with financial advice and services with respect to the investment of funds. Milliman, Inc. is retained as consulting actuary. The firm of Dewey & LeBoeuf, L.L.P. is retained as legal counsel to MLMIC. The accounting firm KPMG, L.L.P. serves as independent auditor of MLMIC's financial statements.
